

A Tractor Trailer and Two Other Vehicles Collide on Solomons Bridge, Grinding Traffic to a Halt in Calvert and St. Mary's

Posted by [TBN](#) On 03/13/2006

An accident involving three vehicles occurred this afternoon on the Solomon's Bridge between St. Mary's and Calvert Counties.

Preliminary reports suggest the accident took place on the North-bound lane of the bridge.

One car was able to drive away from the crash, but a tractor trailer that was involved became stuck on the bridge, obscuring traffic in both directions for some time.

Considerable tail-backs were just beginning to clear on the St. Mary's side of the bridge, at 3:15 pm, although traffic continued to be backed up along 235 as drivers Calvert-bound waited and waited to turn onto Rt. 4. A tow-truck responded and loaded one of the crumpled vehicles at 3:29 pm, after navigating its way onto the bridge with assistance from police. At 4:07 pm police reported that the tractor trailer has finally been cleared from the road.
